## 60 mm system

# eta

12 x 5 (mm) copper bars - In 200 A

Bar part number: 01 618

Support part number: 01 495

Support CL distance (mm)	I <sub>cw</sub> (kA for 1s)	I <sub>pk</sub> (kA)
200	12	24
250	12	24
300	12	24
350	12	24
400	12	24
450	12	24
500	12	24
550	12	24

All values were extrapolated through calculation from the values of the 20x5 tested system and are valid for any number of supports (calculations according to standard EN 60865-1).

**NOTE:** The I<sub>cw</sub> value of 12 kA is the limit value calculated for the thermal effects of a failure lasting 1s and not for the mechanical resistance of copper. The calculation proves that such value can be maintained up to a 550 mm CL distance between the supports
